### From the Viewpoint for Evaluating the Efficacy Test

Hiroshi TOKUNAGA\*

#### Abstract

The approval system of cosmetics was drastically changed after April 1, 2001. Therefore the cosmetic companies have to evaluate and secure the safety and efficacy of cosmetics by themselves. The Ministry of Health, Labour and Welfare has already established 55 kinds of items for the cosmetic efficacy but did not announce the efficacy tests for evaluating. So I would like to consider the evaluation of the efficacy test for cosmetics.

**Key words:** efficacy test for cosmetics, evaluation, pharmaceutical affairs act.
