The Prevention of the Wrinkles by the Sunscreen Product

Kohji MATSUE

Abstract

The protection against both of UVA and UVB is necessary for the prevention of the wrinkles of the photoaging. And, the always UV protection is also necessary for the prevention of photoaging. When we consider the UV protection on daily life, the protection against UVA is very important. We should develop the sunscreen formulation which has higher protection against UVA and which can be used habitually and easy. And then, we tell the information of ultraviolet radiation and the appropriate usage of the sunscreen product to consumers.

Key words: ultraviolet radiation, wrinkle, photoaging.
