**What Is a Cosmetics That Is Expected?:
Let Your Dream Come True from Your Laboratory**

Akira OZAWA

Abstract

The Japanese Cosmetic Science Society (JCSS) were organized to establish “Cosmetic Science,” to consider the cosmetic the “Safety” against “Cosmetics pollution,” which caused by the development of the cosmetics industry after the war. And “Safety & functional evaluation guidelines” has been proposed by the Society. Therefore, the JCSS should promote to make useful and safety cosmetics, which is expected, with scientific findings by researchers sincerely. I have been studied on “Psoriasis,” which is an incurable disease and whose cause is unknown. Namely, researches have been carried out as to the association between HLA (human leukocyte antigen); disease-related genes, and psoriasis. Initially, many dermatologists said “blood type fortune-telling?,” “story like a dream” and so on. In 1979, however, the Japanese Dermatological Association Award was given for this project. And it is now stated “Strong correlation between HLA-C gene in psoriasis” both on Japanese and on international dermatological textbooks. Exactly, the research project has been become to a situation where a dream might come true from the laboratory. Therefore, the slogan was “Let your dream come true from your laboratory!” in the 39th Annual Meeting of JCSS and the following concepts were planned.

- (1) At all presentations by oral
- (2) Two special lectures and a symposium of “Aims to further improve the security and trust”
- (3) “Let’s enjoy the Society”

Nowadays, social, ethical, economic environment for research, have become quite severe. It is, however, considered that there is great value in that precisely because such a time, to bring fresh ideas, a goal without unwavering, toward the realization of that dream, to move forward. It is really hope that the dream of members in the JCSS, who do his best for his research sincerely, while drawing on the head “Cosmetic that is expected,” in the laboratory will be come true.

Key words: JCSS, psoriasis, HLA, dream come true.
