**Preface for “Basic Lecture on Adverse and
Favorable Effects of Cosmetics by Dermatologists”**

Editor-in-Chief Tetsuji HIRAO

Abstract

The aim of this lecture series is to provide basic knowledge on skin troubles induced by cosmetics, as well as usefulness of cosmetics on skin disorders. Articles of this series, described by expertized dermatologists and planned for three years, will include various aspects of skin troubles of cosmetics and use of cosmetics by subjects with troubled skin. I hope that this lecture series will be helpful, not only for cosmetic scientists, but also for clinical dermatologists.
